

Luminello

HANDCRAFTED LIGHTING

Luminello Lighting

Timeless design, handcrafted with soul.

Since 2012, Luminello has been creating lighting with character. Each piece tells a story of craftsmanship, sustainability and aesthetics. Founded by Sven Algoet — a creative entrepreneur with over 30 years of experience in the lighting industry — Luminello chooses a different path: away from mass production, back to essence.

Our fixtures are designed in Belgium and handcrafted in small ateliers in Belgium and Italy. We work closely with artisans who truly master their craft. Their dedication, precision, and expertise transform every design into a unique object of quality.

We use only sustainable materials like brass, porcelain, terracotta, and glass. These age beautifully, develop a unique patina, and are made to last for generations — a conscious choice for people, materials, and the planet.

Our own concept store in Eke (near Ghent) is the heart of Luminello. It's a place where you can discover our collections, find inspiration, and receive personal guidance for your project.

Luminello is more than lighting.
It's an ode to purity,
detail, and timeless beauty.

SABBIA WHERE COSY MEETS VACATION

PHOTOGRAPHY SABBIA:
BERT DEMASURE

SABBIA was born from the desire to bring the feeling of vacation into the everyday interior. Inspired by Laura Calleeuw's Cosycation philosophy, designer Sven Algoet translated this feeling into a tactile lighting collection where light, texture and natural imperfection come together.

Cosycation is about creating interiors that feel warm, serene and welcoming, while evoking the sense of escape and relaxation we associate with being on holiday. A feeling of coming home, while still carrying with you the calm of somewhere far away.

For SABBIA, this feeling is expressed through a distinctive natural material: a composite made from ground sand and shells. Its subtle, grainy surface brings the atmosphere of the coast indoors. No two surfaces feel exactly alike. The small imperfections and variations become part of its beauty — just as they are in nature.

Sand shaped by wind. Shells softened by the sea. Textures created over time. This organic imperfection creates a sense of calm and serenity, giving each piece its own character without ever becoming overpowering.

SABBIA is conceived as a modular lighting system, allowing individual elements to be combined into different compositions. From a subtle pendant to a more sculptural lighting installation, each composition can be adapted to the architecture and atmosphere of a space.

The result is more than lighting. It becomes part of the interior — a tactile architectural element that brings light, texture and identity together.

SABBIA is crafted in Belgium, with careful attention to material, detail and finish. The brass components are produced in Venice, Italy, combining Belgian craftsmanship with the tradition and expertise of Italian brasswork.

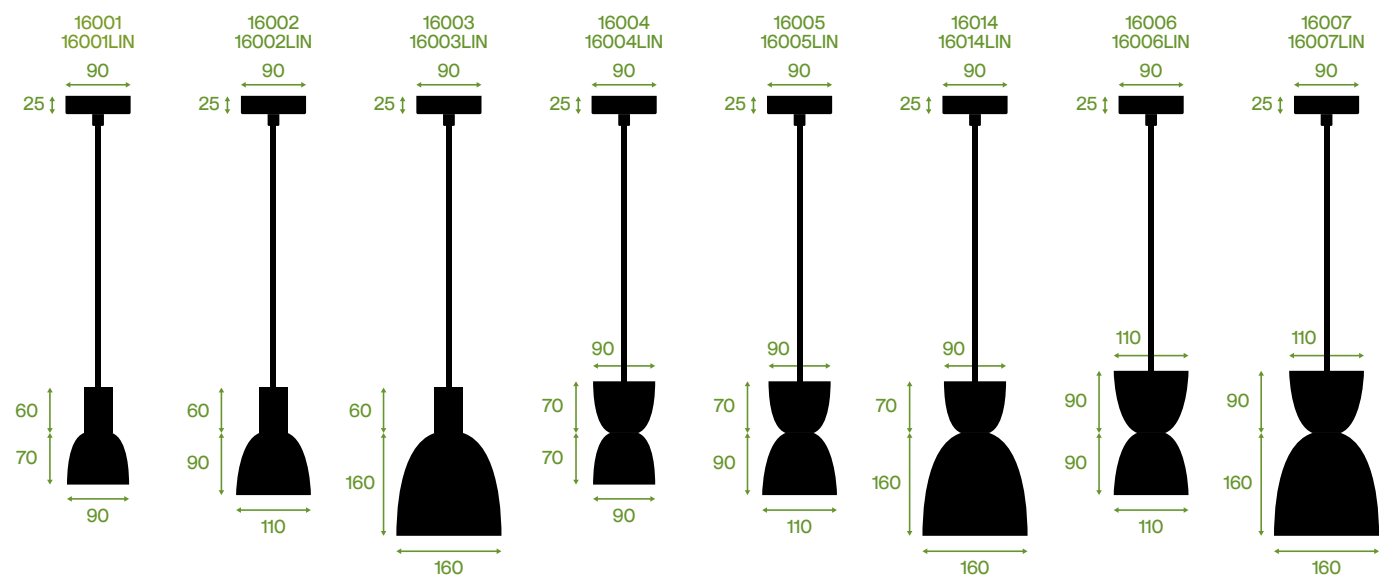

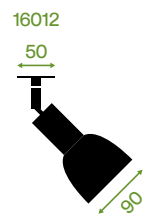

SABBIA is designed by Sven Algoet, inspired by the Cosycation philosophy of Laura Calleeuw.

A collection where sand, light and texture meet — creating an atmosphere that feels natural, timeless and quietly serene.

Where cosy meets vacation.

OXO SYSTEM

OXO is the latest addition to the Luminello family: a refined collection offering a wealth of possibilities, crafted from authentic oxidised brass. Each piece develops its own unique patina during the production process, making OXO not just a light source, but a characterful object within your interior.

Beneath the warm oxidised surface lies cutting-edge LED technology. OXO combines energy-efficient performance with excellent light output and long lifespan. The spotlight is designed to offer a subtle, focused beam — ideal for highlighting accents or creating a warm, atmospheric glow.

OXO is where raw materials and modern technology meet. Timeless, robust, and unmistakably Luminello.

TERRA

TERRA is a tribute to the earth itself. This elegant pendant light is crafted from clay sourced locally in the region around Montelupo Fiorentino, Italy. Each piece is hand-thrown, making TERRA a unique, artisanal object with a distinctive character.

The warm, natural look of the ceramic contrasts beautifully with the refined finish and clean lines. Inside, the latest generation of LED technology ensures powerful, energy-efficient, and long-lasting illumination.

TERRA is available in two sizes — Small and Big — allowing you to match it perfectly to the scale and atmosphere of your space. Combine different sizes for a playful and layered effect above a table, kitchen island, or in an open setting.

LIDO

ELEGANCE IN MOTION

LIDO is a luminaire born from a moment of wonder. Designer Sven Algoet drew inspiration from seabirds gliding on coastal thermals — effortlessly, silently, and with natural grace. This sense of airy motion is captured in the design of LIDO: a fixture that appears to float, light yet powerfully present.

Handcrafted in Venice from solid brass, LIDO radiates warmth and character. The fixture is available in two finishes: Rubbed Brass — a rich, warm brass tone with a soft glow and Dark bronze — a deep, weathered finish full of character

LIDO comes in two sizes — Medium and Big — and is available as either a pendant or ceiling-mounted version. Thanks to its versatility and timeless aesthetic, LIDO has become a signature piece in the Luminello collection.

FARO DI MURANO

Inspired by the iconic lighthouse on the Venetian island of Murano, this pendant is an ode to light, craftsmanship, and refinement. Faro di Murano is handcrafted in Belgium from carefully composed porcelain blends — a process that, thanks to the expertise of porcelain specialist Filiep, has led to an exceptional result.

Each pendant is unique. Due to the manual production process and the natural shrinkage of porcelain — which can lose up to 30% of its volume during firing — every piece takes on its own character. No two are exactly alike, and that is precisely where the beauty lies. Faro di Murano is more than lighting. It is a light sculpture with a soul — timeless, elegant, and subtly nodding to the rich glass and ceramic tradition of Murano.

ST06LEDRB

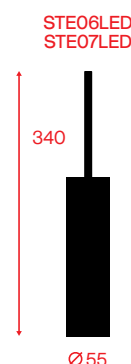

STUPA CANDELA

Stupa Candela is an ode to the softness of candlelight, reimagined as a contemporary lighting object. This pendant fixture emits a warm, soothing LED glow that closely mimics the ambiance of a flame — intimate, subtle, and poetic.

Its silhouette is inspired by the shape of a candle, refined into an elegant volume that exudes calm and simplicity. Available in two characterful finishes — rubbed brass and dark bronze — Stupa Candela plays with texture and light reflection, offering a layered and atmospheric experience.

Perfect above a table, whether in a series or on its own, this pendant brings a touch of serenity to any space. Like all Luminello designs, Stupa Candela is handcrafted from solid brass — a lasting object with soul and presence.

OLLY FROM FINE DINING TO LIGHT OBJECT

OLLY is the result of an inspiring encounter between two creative worlds: design and gastronomy. This unique fixture was born from a brainstorming session between Luminello founder and designer Sven Algoet and chef Olly Ceulenaere of the Michelin-starred restaurant Publiek in Ghent. The result? A refined lighting piece with a bold personality — both sophisticated and robust, much like a well-crafted dish.

OLLY is entirely handcrafted in Italy, made from solid European brass of the highest quality. The fixture comes in three sizes — Small, Medium, and Big — and is available in two elegant finishes: Bi-Color (a subtle interplay of contrasting metal tones) and Rubbed Brass (a warm, deep brass tone with a richly textured surface). This pendant fixture radiates refinement while remaining timeless and strong in presence. OLLY is made to mix and match — combine different sizes and finishes for a lively, layered play of light above a table, bar, or open space.

OLLY is more than a fixture — it's an ode to craftsmanship, taste, and collaboration.

ARCA COLLECTION

The Arca Collection by Luminello exudes subtle elegance, defined by pure lines and a balanced design. This collection includes one ceiling fixture and two pendant versions, and is exclusively available in a warm rubbed brass finish.

Each Arca fixture is crafted from solid brass and hand-finished, resulting in a rich, vibrant texture and a timeless character. The combination of material and form gives Arca a distinctive architectural presence that enhances any space with atmosphere and refinement.

Designed and produced with care in Belgium and Italy, the Arca Collection reflects the artisanal craftsmanship and sustainable vision that define Luminello.

TUBO SYSTEM

Infinite freedom in light and form.

With the Luminello Tubo System, you take full control of your lighting. No longer limited by fixed electrical points – you decide where the light goes. Whether you choose pendants, spots, or a combination of both: Tubo gives you the freedom to design on your terms.

This modular and flexible system allows you to create a custom light line that suits your space – straight, angular, or playful. Perfect for those who want to combine functionality with a strong aesthetic signature.

Why choose Tubo?

- Full design freedom: place light exactly where you need it
- Modular system: combine pendants, spots, and connectors
- Sleek and architectural look
- Ideal for both renovations and new builds
- Made from solid brass with a rich Dark Bronze finish
- One finish, endless possibilities

Tubo is available in a single finish: Dark Bronze – a deep, warm tone that radiates both strength and subtlety, blending beautifully into a variety of interiors. Whether you're lighting a cosy dining area, highlighting a workspace, or giving character to an open space – Tubo is your system, your rhythm, your light.

READING LAMPS WITH INSIGHT

Our reading lamps were created from a simple question: what makes a lamp really suitable for reading? From our own daily reading moments, we have developed well-thought-out models that combine comfort, functionality and atmosphere.

When choosing a reading lamp, placement is essential. That is why we offer two types:

A straight vertical tube (such as the Floor Lamp and Furniture Floor Lamp) is ideal next to a sofa or chair. A slanted tube (such as the Clara Floor Lamp) is designed to slide subtly behind a sofa or armchair. All Luminello reading lamps share the same smart features: A narrow floor base that you can easily slide under or next to furniture. A rotating head that allows you to direct the light exactly where you want it. An extra long cable, because the socket is rarely where you need it. Each lamp is built with the same attention to material, finish and technology that you have come to expect from us – so that all you have to focus on is your book.

DISCOVER THE LUMINELLO CONCEPT STORE

A place where light, materials and design come together

Step into the world of Luminello – a world where every detail matters. In our concept store, you get the unique chance to experience our full lighting collection up close. Feel the textures, observe the light, and witness how form and function seamlessly blend.

Drop by, explore, get inspired.

You're welcome to visit without obligation or cost – whether you're looking for ideas, developing a project, or simply curious.

A personal welcome from the designer himself

Sven Algoet, founder and creative force behind Luminello, will greet you personally. He's happy to share the stories behind the materials, the artisanal production in Belgium and Italy, and the philosophy that guides every design.

Created in collaboration with top Belgian brands

The concept store was developed in close partnership with carefully selected Belgian companies known for their excellence:

- Atelier Vierkant – sculptural ceramics
- Loewe – refined audiovisual experiences
- Robu – handcrafted Belgian furniture
- Artsound – high-end audio
- Niko – exclusive switches and home control

You'll also discover the work of artist Wim Vandersleyen, whose minimalist, graphic approach perfectly aligns with the spirit of Luminello.

Tulpenstraat 15-B7
9810 Eke

Book your

Sven Algoet
Designer and Founder of Luminello

A design vision rooted in material and craftsmanship

Sven Algoet is the driving force behind Luminello. With a background in interior design and over three decades of experience in lighting, he developed a distinct design style based on three pillars: pure craftsmanship, timeless use of materials, and meticulous attention to detail.

The power of brass, porcelain, terracotta, and Murano glass

What sets Luminello apart is Sven's approach of starting from the material itself. Solid brass, with its warm glow and natural patina, forms the heart of his collection. Porcelain, terracotta, and mouth-blown Murano glass also play a leading role. Each material is carefully selected, not only for its beauty but also for its durability and soul.

Detail-driven, functional design

Whether it's a refined wall lamp or an elegant pendant fixture, every piece is the result of a deeply thoughtful creative process. Sven leaves nothing to chance – from proportions to hidden screws, every detail contributes to the simplicity, functionality, and elegance of the final result.

Lighting with soul

Sven Algoet's luminaires are designed to last for generations. They add character to a space without dominating it, and evolve with their surroundings. With refined materials and understated elegance, they fit seamlessly into both minimalist and classic interiors.

Authentic and forward-thinking

With Luminello, Sven remains true to his mission: to design and produce lighting objects that excel both aesthetically and technically. In a world of mass production, he deliberately chooses small-scale, local manufacturing and artisanal finishing.

"Real quality lies in the things you don't see – but can feel."

— Sven Algoet

Luminello BV reserves the right to change, at any time and without prior warning, the price and the technical specifications of any product illustrated in this catalogue.

Graphic design:

Photography
(unless otherwise specified):
bartvanleuven.com

Oxidation finish is very decorative, which is why we offer various devices in an 'oxidised' version (dark bronze/rubbed brass/satin). With this version, colors may differ from the models shown in our catalog and/or showroom. Fixtures from our collections are finished with a matte varnish layer; this layer can be damaged by exposure to toxic substances, by being sandblasted, by polishing with corrosive cleaning products, acid rain etc. As a result, the lighting may deviate in time from color and get a natural patina. We do not accept any complaints regarding these side effects because they are natural and/or specific to the material, or because there is a free choice for a specific version of a lighting device and its application. Finishes can also be custom made according to the project specifications.

A light fixture
should be beautiful
not only
when it's lit.
